IMPORTANCE OF RELATIONSHIP

Because life is about involvement especially with people – think of your daily routine with and without healthy relationship

A big part of moments and quality of life is impacted by people we live with

A relationship can break or make our physical, emotional and spiritual life even being distant

The whole theory of happiness and pleasure is on EXCHANGE. We lose we are sad, we find we are happy, we give we feel bliss

Purpose, winning, reforming, transforming, innovating, discovering, inventing, elevating – all of these have no meaning if we don't have a healthy relationship

TYPES OF RELATIONSHIPS

- **Given** – Passed on as a part of system | family, relatives, successor
- **Made** – paired by someone else | Marriage, colleagues, boss
- **Chosen** – you choose as you need them | friends, partner, love
- **Happened** – no one works for it, it just happens | Master, Mentor

WHAT IS RELATIONSHIP?

- A defined code of conducts
- A set of conducts = a relationship code
- If you follow those conducts = you accept that code
- You have accepted that code = you follow those conducts

PHASES OF A RELATIONSHIP

Budding phase – gives no pleasure, no pain

Development phase – gives some pleasure, some pain

Performance phase – makes something big, better, new

Survival phase – effort of saving, who they are, what they do what they have

Setting phase – trying to hold onto what's left, preparing to let go slowly, trying to detach what's gone

Rising phase – find replacements, options, start all over again, change life style, change of perception, belief, way of life

THE BASICS OF RELATIONSHIP

Codes

Conducts

LET'S GO DEEPER

Code is constant like Y

Conduct is variable like X

you give them

-  **Financial** – help, future security, happiness, lavishness, dreams
-  **Emotional** – sweet, caring, kind, romantic, sensitive, attention for little things

SITUATIONS THAT TIME GIVES YOU

-  **Suddenly developed** – something changed in the person, family
-  **Gradually developed** – one incident led to another, someone planned
-  **Constant and ongoing** – something keeps happening regularly, fight

NATURE THAT LIVES IN YOU

When things are normal – happy, funny, neutral, serious, selfless, selfish

When things are different – annoyed, understanding, extra caring, ignoring, emotional

When things are intense – neutral, careful, angry, detached, changed, look for options, determined to fix, hopefully or hopelessly wait

KEY GLITCHES IN RELATIONSHIP SYSTEM

Replaced with other conducts – bringing office rules home

Mixed of additional conducts – playing husband and daddy same way

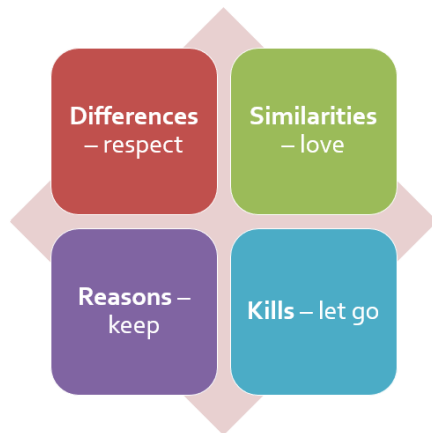

Delete of important conducts – stop paying attention in romantic relationship

Doubling the existing conducts – too much care feels like nagging

Manipulating the existing conducts – faking, not using, depowering

4 GOLDEN WORDS

3 GOLDEN STRATEGIES

**IF YOU WANT IT – KEEP
WORKING FOR IT**

**IF YOU NEED IT – KEEP ALL
THE REASONS FOR IT**

**IF YOU HAVE TO HAVE IT –
DO NOTHING TO LOSE IT**

THINGS TO REMEMBER

- You are right! you are just good – if you don't need one, don't want one and don't have to have one.
- Before you try to get into someone else world's – make sure you have your own.
- No matter what is your relationship approach is – every approach will have its own effect and side effects
- Since all of us are unique – so are our relationships – so are our problems and so are the solutions

- When relationship has gone bad – change your code and act like friends
- You are not drawn because you jumped into the water it is because you try to stay on it – keep moving slowing when it is survival phase. don't' make noise – there might be crocodile in the water.

ADDICTION OVERCOME GENERAL TIPS

- **Be Accountable to Someone** -In the professional world, what is the strongest motivator for peak performance?
- **Start a Project** - Here's a valuable tip I learned in the psych ward–the fastest way to get out of your head is to put it in a new project–compiling a family album, knitting a blanket, coaching Little League, heading a civic association, planning an Earth Day festival, auditioning for the local theatre, taking a course at the community college.
- **Be the Expert** - The quickest way you learn material is by being forced to teach it
- **Get on Your Knees** . Ask help from the God.
- **Celebrate your accomplishments.** Do something nice for yourself when you meet the goals you've made, no matter how small. Kicking an addiction is incredibly tough work, and you deserve to be rewarded.
- **Heal your damaged self** - The only way to restore your sense of loss is to work on building your self-esteem and self-worth.

ADDICTION OVERCOME GENERAL TIPS

- **Don't listen to sad romance songs and don't watch depressing movies** or even romantic ones- The love songs you hear have the power to influence you to feel all sorts of negative emotions and make you cry.
- **Destroy the memorabilia** - Burn the pictures of your times together, throw out the love letters and stop going to the places that remind you of your ex. Deleting your past memories such as your photos from your computer will help your subconscious to realize that the relationship is really over.
- **It's normal to feel rotten after being dumped.**
- **Transform yourself physically** - It is common for many people to neglect to take care of their physical appearance during a relationship.
- **It's finally your time to make your debut** - It's natural to want to make a reconnection with your ex to show them the new you that you're proud of. Remember to only reconnect with your ex when you're feeling good about yourself, when your life is in control and when you no longer have anxiety and hate when you think about your ex.

ANGER COUNSELLING 004

ANGER COUNSELLING

COUNSELLING MASTER CLASS

TWO POINTS OF ANGER

Trigger

Fuel

ANGER – MYTHS

- **Myth: I shouldn't "hold in" my anger. It's healthy to vent and let it out.** **Fact:** While it's true that suppressing and ignoring anger is unhealthy, venting is no better – imaging venting out aggressively
- **Myth: Anger, aggression, and intimidation help me earn respect and get what I want.** **Fact:** Respect doesn't come from bullying others. People may be afraid of you, but they won't respect you if you can't control yourself or handle opposing viewpoints.
- **Myth: I can't help myself. Anger isn't something you can control.** **Fact:** You can't always control the situation you're in or how it makes you feel, but you can control how you express your anger. And you can communicate your feelings without being verbally or physically abusive.

WHAT MAKES YOU ANGRY?

- **You** – Emotional Range, Attitude, Experience
- **People** – Behaviour, Selfishness, Dominance
- **Things** – Finding & losing, out of order
- **Nature** – Overpowering, Random act, out of reason

ANGER - DEALING WITH BASIC THEORY

01

Refuse – smart knows what to say but wise knows say or not

02

Confuse – just give them content, let them decide context

03

Defuse – fight fire with fire? But fireman are seen using water

04
